3	<u>Prevailing market rate of land (Along with details /reference of at least two latest deals /transaction with respect to adjacent properties in the areas):</u> The developed land i.e., Residential category plots under consideration is near 12 Ft. Wide Bidhanpally Road Connected To Rishi Arabinda Road, Kalyani Area. On surveying local market rate, it was revealed that the such type of land near to Netaji Road, Kanchrapara Area, is generally used to sell/purchase by the willing parties @ Rs. 3,00,000.00 to Rs. 4,00,000.00 per Decimal for Residential land, depending upon site, situation, frontage, depth, natur0 and existing use. So, it is prudent to apply average rate taking into consideration a conservative approach. The average rate of land, as mentioned above, is thus estimated as Rs. 3,50,000.00 per Decimal . It includes huge developments made towards filling, leveling and dressing of land.

Market Value of Land

Location: Kolkata, Municipal, Block: Eastern Pally, Panchayat: Eastern Pally, Ward No.: 1, Khass Ghatki: KALYANI

Area of Land: 2.37 Decimals

Existing Market Value of Land: Rs. 7,44,754/-

Service Count: 47,51,588

Stamp: S. SEN & ASSOCIATES, 75, Southern Avenue, Kolkata-29, ESTD-1982

Web Site	Land area in Decimal	W.B. Govt. Rate. per Decimal	Total value in Rs.
W.B. Govt. Rate	2.37	3,14,242.19	Rs. 7,44,754.00
Local Rate	1.00	3-4 Lakh	--

From the above it appears that the Govt. Web site rate is Reasonable in comparison to Local rate and other Web site rate, as of now keeping in view the development of surrounding areas, marketability, connectivity, Demand of Vacant Residential spaces etc. Hence the Govt. guide line rate can be taken as a barometer for assessing the fair market value which, evidently, does not allow for market trends that take into consideration such factors as location, shape & size, nature of surrounding, tenure & status, usage, demand & supply of the commercial and Residential spaces etc. Since this has been an exclusive and affluent locality where real estate properties are in considerable demand, the available information tends to become speculative. As a matter of fact, the price of Real Estate Sector has recently been affected considerably by the consequences of various factors that have come into play in market trends recently. As a result, substantial disparities have come about between the Government rates and fair open market prices of Residential Spaces. This, evidently, is a phenomenon of recent origin of unpredictable duration. We have endeavored to keep the market rate at a non- speculative fair market price by using our experience and judgment. Hence after comparing Web-site rate prevailing as on the date of inspection it is prudent to apply average rate taking into consideration a conservative approach.

Rs. 3,50,000.00 per Decimal for Residential usage.

5	Assessed /adopted rate of Valuation	Rs. 3,50,000.00 per Decimal
6	Estimated value of land	Rs. 2.37 X 3,50,000.00= 8,29,500.00 per Decimal

Details of valuation

Technical details of the building

In arriving at the valuation as per this method the following assumptions have been made:

Since, the details of estimate and costs of individual items of construction are not known to us, a rate per sq. ft. for the building of the superstructure has been taken into our calculation which has been based on market rates of building materials as well as labor charges estimated to be prevalent at present. Here construction cost is considered per sq. ft. of Built-up area

DEPRECIATION

Depreciation of the said building is Considered as on the date of Valuation as follows: -

Total Life Building = 80 Years, Building Age = 14 Years, Remaining Life = 66 Years

Thus, Market Value=Building Covered area X cost of Construction as on the date of valuation– Depreciation

Rate of Depreciation on Building: $\{[(14 \times 0.9)/80] \times 100\} = 15.75\%$

Minimum Realizable Market Value and Distress Value

We have estimated the Minimum Realizable Market Price and Distress Value by taking into consideration the age of the building, local conditions and general market trend etc. as 90% and 80% respectively of the calculated Fair and Reasonable price.

Sl. No	Particulars of item	Plinth area in sq. ft.	Roof Height in ft.	Age of Building In years.	Rate in Rs.	Value in Rs.	Depreciation	Total Cost in Rs.
